James Parker

FRONT-END TYPESCRIPT DEVELOPER

Profile

I am an experienced TypeScript developer with a focus on React, Vue.js, and Node.js, possessing extensive knowledge of various programming languages and frameworks. I excel in fast-paced, collaborative environments, and have excellent problem-solving and communication skills. Committed to staying up-to-date with the latest industry trends and best practices, I am eager to contribute my skills and expertise to projects that make a positive impact, seeking opportunities to collaborate on full-time or contract roles.

Employment History

Senior Front-end Developer, Wise, Solihull

JULY 2022 — NOVEMBER 2022

As a team member at Wise, I am responsible for updating and enhancing the existing features of our system, developing new components, and refining code to optimise quality. In addition to this, I provide invaluable support to my colleagues and collaborate closely with the lead front-end engineer to advance our long-term objectives and integrate cutting-edge technologies. Leveraging tools such as Next.js, React.js, and TypeScript, I execute my duties with precision and efficiency, striving to maintain the highest professional standards at all times.

Lead Front-end Developer, Contract Role, Northampton

OCTOBER 2021 — AUGUST 2022

In this contract position, I led a talented team of front-end developers in the development of a highly sophisticated white-label system designed to manage and maintain theme parks. My responsibilities encompassed overseeing the project's implementation from start to finish, ensuring its timely delivery, and upholding the highest quality standards throughout. Drawing on my expertise in Vue.js 3, TypeScript, JavaScript, and SCSS, I developed and executed an effective development strategy that resulted in the successful completion of the project.

Lead Front-end Developer, Contract Role, Northampton

NOVEMBER 2021 — FEBRUARY 2022

As the lead front-end developer, I supported and managed a small team in building a marketing website with CDN UI for a Northamptonshire-based company. The project was built using Nuxt.js 3, Vue.js 3, TypeScript, JavaScript, and SCSS. My leadership and expertise ensured the successful delivery of the project, resulting in a visually appealing and user-friendly website for the company's clients and customers.

Senior Front-end Developer, Contract Role, Northampton

JUNE 2021 — NOVEMBER 2021

At a London-based agency, I supported junior developers working on new and existing websites using various technologies, including Vue.js 2/3, Nuxt.js 2, React.js, TypeScript, JavaScript, SCSS, PHP, and Laravel. My expertise and guidance enabled the timely delivery of high-quality projects for the agency and its clients.

Lead Front-end Developer, Contract Role, Northampton

MAY 2021 — JULY 2021

In this role, I maintained legacy systems/websites while supporting the team in modernising them with more current frameworks and technologies. I utilised a range of tools, including Vue.js 3/2, React.js, TypeScript, JavaScript, ASP.NET, and SCSS to achieve the desired outcomes. My contribution to the team ensured that the systems/websites were up-to-date and effectively meeting business needs.

Support Lead Front-end Developer, Contract Role, Northampton

FEBRUARY 2021 — MAY 2021

I joined this project as a support lead front-end developer to assist the current lead developer in their new responsibilities. In this role, I provided comprehensive support to the lead developer throughout the day, while simultaneously working on a client portal for the company. Leveraging my extensive experience in Vue.js 3, JavaScript, and SCSS, I developed an intuitive and user-friendly client portal that met the company's specific requirements.

Lead Front-end Developer, Contract Role, Northampton

DECEMBER 2020 — MAY 2021

In this contract role, I led a team of front-end developers and worked closely with company leads, back-end developers, and devops teams. We successfully developed a new social media platform for web launch using Vue.js 2, JavaScript, and SCSS. As team leader, I provided guidance and direction to ensure timely delivery while maintaining high quality standards.

Lead Front-end Developer, Engine Creative, Northampton

JUNE 2020 — MAY 2021

While at Engine Creative, I provided support and management for a small front-end team, as well as quoting on various projects requiring front-end work. This role provided me with a highly interactive experience, working on client projects across multiple languages and platforms to ensure their specific needs were met. Throughout this role, I worked with a diverse range of technologies, including Blazor, ASP.NET, C#, JavaScript, TypeScript, Vue.js 3/2, React.js, Nuxt.js, and SCSS.

Lead Front-end Developer, Contract Role, Northampton

FEBRUARY 2020 — APRIL 2020

At a Milton Keynes-based agency, I supported a team of front-end developers during a hiring process, assisting in the hiring of a new lead role. My responsibilities included maintaining the current systems, addressing issues and deploying updates. I leveraged Vue.js 2, JavaScript, and SCSS throughout this role.

Lead Front-end Developer, Northampton Students Union (Temp), Northampton

JULY 2019 — FEBRUARY 2020

In this role, I maintained, managed, and updated websites and systems. I designed and deployed a new website UI and updated the CRM in the till system. My toolkit for this role included JavaScript, PHP, Laravel, and SCSS.

Lead Front-end Developer, Contract Role, Northampton

JUNE 2018 — JULY 2019

As the team lead for a startup's delivery management system project, I oversaw a small team of front-end and back-end developers. In addition to providing guidance and support to the team, I was also responsible for managing project timelines and contributing to the development of the system. To build the system, I utilised Vue.js 2, TypeScript, JavaScript, PHP, Laravel, and SCSS.

Lead Front-end Developer, Contract Role, Milton Keynes

FEBRUARY 2019 — JULY 2019

In this role, I was tasked with leading a team of developers in the redevelopment of a university website, including the creation of both the front-end and the backend content management system using Silverstripe CMS. My responsibilities included ensuring timely and successful project completion, managing the team of developers, and implementing technologies such as JavaScript, PHP, and SCSS.

Senior Front-end Developer, Contract Role, Kettering

JANUARY 2019 — JANUARY 2019

During this role, I was tasked with assisting the company in resolving a backlog of projects that had accrued during the Christmas period. This entailed working on a diverse range of websites over the course of the contract. The technologies utilised during my tenure included Vue.js, JavaScript, PHP, Laravel, and SCSS.

Senior Front-end Developer, Grosvenor Leasing, Kettering

SEPTEMBER 2017 — JUNE 2018

In this role, I held the responsibility of overseeing and fulfilling all front-end requirements for the company, including marketing websites, mobile applications, internal systems, and client portals. Notably, I spearheaded the re-design and development of all online apps owned by the company. My technical expertise during this period included JavaScript, PHP, ASP.NET, and SCSS.

Front-end Developer, In.House.Media, Northampton

JUNE 2015 — AUGUST 2017

As a junior developer, I initially created HTML and CSS templates for clients' main pages, worked on content management, and made minor updates to existing sites. As my skills developed, I designed and developed new websites for clients, updated existing ones, and provided UI design support. Additionally, I supported clients' Google AdWords accounts. My development work utilized PHP, Laravel, JavaScript, and SCSS.

Education

Digital Media, Northampton College, Northampton

While studying digital media at Northampton College, I obtained a PPP grade and gained extensive knowledge in various fields within the media industry. Throughout the course, I studied modules such as Video Creation, Advertisement, Sound Design, Basic Website Development (Adobe Dreamweaver), and more.
